Product Detail:

Code: P00455 Model:PLASMA 735 LCD INVERTER

The three-phase power source with inverter technology for metal plasma cutting, PLASMA 735 LCD INVERTER, is characterized by compact design, low weight, user-friendliness and cutting higherficiency.

It's suitable for manual and automatic medium-heavy applications in craft and industrial sectors.

The optional CNC interface, the display and the synergy allow an easy integration with pantographs.

The recommended cutting thickness on steel is from 19 mm to 25 mm. The separation thickness is 35 mm.

The lack of High-Frequency start makes it possible to work next to computers, medical equipment, instruments and any other electronic device sensitive to high frequency emissions.

It can be connected to motor-driven generators of adequate power. MAIN FEATURES

- •Automatic setting of appropriate voltage within the following ranges: 3x208/220/230V and 400/440V.
- Pilot Arc to cut painted or coated metals.
- Suitable for plasma gouging.
- •Self Restart Pilot function for nets and grids cutting.
- •Ultra Cut Capacity technology to improve the cutting capacities on high thicknesses.
- •Innovative Thin Cut technology that allows to obtain cuts of superior quality and reduced kerf (amount of removed material).
- Hyper Speed Cut technology enhancing the cutting speed.
- Multi Piercing technology: possibility of piercing on high thickness in a shorter time and with less wear of consumables.
- Extra Life technology and Low Pilot Arc technology that increases performances and duration of consumables.
- •The graphic LCD display with operator synergic interface especially useful for mechanized cuttings.
- •Long Tip Cut technology allowing to cut close to very narrow angles and small spaces.
- Microprocessor-controlled cutting parameters and functions.
- Possibility to activate a security password.
- •Safety systems on the torch.
- Its standard equipment includes a 6 meter-long hand torch and a grounding cable.

OPTIONAL FUNCTION

• CNC interface to exchange the main cutting signal with the automatic CNC bench.
