Code: B00403 **Modèle:**DEFINITION CUT 1250x1250 mm 3 axes

CNC plasma cutting table, of the DEFINITION CUT range, proposed by Elettro C.F. for productions of small series. It offers a usable cutting space of 1250x1250 mm and works on three axes. Thanks to its four motors, it reaches a cutting speed of 6000 mm/min.
It's characterized by a strong frame, a thorough design and a careful construction. It combines the use of quality components and accessories with an easy set-up and an intuitive CAD/CAM software that allows you to import files created with other programs or lets you quickly and easily create shapes, even complex, and then go directly to the cutting phase.
It's equipped with an anti-collision system to avoid damaging the torch. In the 3-axes work, our height control THC automatically adjusts the height of the Z-axis assuring clean and precise cuts even on curved and bent sheets and ensuring a longer life of consumables.
The best operating results in terms of quality and productivity are obtained using it with an Elettro C.F. plasma cutting machine of the DEFINITION PLASMA range.
In addition, using our interface kit you can get the START and OK TO MOVE signals, very important to have excellent cutting results.
